ABOUT ME

Backend Engineer with 3 years of experience delivering enterprise-scale financial systems and transaction platforms within banking and financial services environments. Skilled in designing scalable backend solutions, microservices, and system integrations using Java, Spring Boot, Spring Batch, webMethods, Oracle Database, Apache Kafka, Docker, and OpenShift. Also experienced in full-stack financial application development using React.js, NestJS, PostgreSQL, and CI/CD automation with GitLab and GitHub Actions. Strong exposure to Agile Scrum delivery, technical documentation, software testing, and cross-functional collaboration to build reliable, maintainable, and high-performance business solutions.

EDUCATION

DINAMIKA UNIVERSITY

Bachelor of Information Systems
Cumulative GPA: 3.83/4.0

Surabaya, Indonesia
Mar 2023

WORK EXPERIENCE

PT BANK NEGARA INDONESIA (Persero) Tbk

Backend Engineer

Jakarta, Indonesia
Jul 2024 – Aug 2026

- Designed and developed fit-for-purpose backend solutions to achieve sprint goals and deliver business value for wholesale transaction systems.
- Contributed to the development of scalable and resilient system architecture using Spring Boot, Spring Batch, React.js, Kafka (Confluent), Oracle Database, and webMethods integrations.
- Built, enhanced, and optimized CI/CD pipelines using GitLab to support automated build, testing, deployment, and delivery processes across development environments
- Supported containerized application deployment using Docker, Kubernetes (TKGI), and OpenShift Container Platform (OCP).
- Established and maintained best practices for software testing, including unit testing, integration testing, and end-to-end validation to ensure application reliability and performance.
- Performed code quality assurance and peer review processes using SonarQube to enforce clean code principles, maintainability, and security standards.
- Worked collaboratively within cross-functional Agile Scrum teams, actively contributing to sprint planning, technical discussions, problem-solving sessions, and delivery support activities.

PT PEGADAIAN GALERI DUA EMPAT

Full-Stack Developer

Jakarta, Indonesia
Jan 2024 – Apr 2024

- Developed and maintained internal web-based applications to support end-to-end internal system for gold transaction and operational business processes.
- Designed and implemented application features using Java and Vaadin Framework, ensuring system reliability, usability, and maintainability.
- Collaborated closely with Business Analysts to analyze requirements, refine business workflows, and translate functional specifications into technical solutions.
- Coordinated with QA teams during testing cycles to identify issues, perform bug fixing, and ensure application quality prior to release.
- Produced and maintained technical documentation, including functional specifications, technical design references, and development implementation details.
- Supported application enhancement initiatives by improving system performance, optimizing business workflows, and ensuring data processing accuracy.
- Participated in technical discussions and cross-functional collaboration to align system implementation with operational and business objectives.

TRAINING

FULLSTACK DEVELOPER BOOTCAMP: METRODATA ACADEMY

Fullstack Developer

Surabaya, Indonesia

Sep 2023 – Dec 2023

- Completed intensive enterprise application development training using Spring Boot and modern web technologies
- Delivered Career Placement application as final team project

PROJECT-BASED VIRTUAL INTERN: Fullstack Developer Investree x Rakamin Academy

Fullstack Developer Intern

Jakarta, Indonesia

May 2023 – Jun 2023

- Developed secure authentication and authorization features using Laravel
- Applied code security practices, system optimization, and codebase refactoring to improve maintainability and performance

PROJECTS

MANAGED FILE TRANSFER (MFT)

Apr 2026 – Aug 2026

PT BANK NEGARA INDONESIA (Persero) Tbk

- Developed the MFT portal and backend services for secure and automated file transfer processing in a regulated financial environment.
- Built a React.js-based portal for configuration and master data management to simplify transaction file processing workflows.
- Developed generic backend APIs using webMethods to handle CRUD operations and portal integration processes.
- Integrated Oracle database for secure transaction data management and system reliability.
- Collaborated with 6 developers to ensure stable delivery and maintainable system architecture.

SNAP VA PAYMENT AND REFUND

Jan 2026 – Aug 2026

PT BANK NEGARA INDONESIA (Persero) Tbk

- Developed backend services for Virtual Account payment and refund transaction processing using Spring Boot.
- Implemented secure and reliable transaction validation, reconciliation, and refund handling workflows.
- Integrated services with internal banking systems and external transaction platforms for real-time processing.
- Managed containerized deployments using Docker and OpenShift Container Platform (OCP).
- Supported CI/CD automation using GitLab pipelines to streamline development and deployment processes.

COST CONTROL

Jun 2025 – Mar 2026

PT BINTANG FAJAR PERSADA (Project-Based Engagement)

- Developed enterprise financial management application modules using NestJS for backend services and React.js for frontend development.
- Built core budgeting and financial submission modules, including Cash Bank Request, Cash Advance Request, Expense Report, Accounts Payable/Receivable, Customer Billing, Fund Transfer, Payment Submission, and Incoming/Outgoing Cash Realization workflows.
- Designed and implemented asset management and logistics modules to improve operational visibility and resource tracking.
- Developed approval workflows and reporting modules to streamline financial authorization, monitoring, and business decision-making processes.
- Managed relational data processing and persistence using PostgreSQL to ensure data consistency and performance.
- Implemented automated build and deployment workflows using GitHub Actions CI/CD to streamline development and release processes.
- Collaborated closely with stakeholders to translate business requirements into scalable solutions and deliver continuous application enhancements aligned with operational efficiency goals.

LOAN MANAGEMENT SYSTEM

Mar 2025 – Dec 2025

PT BANK NEGARA INDONESIA (Persero) Tbk

- Developed middleware services to orchestrate multiple core loan processing services into unified endpoints.
- Simplified transaction workflows and improved system integration efficiency across wholesale lending processes.
- Implemented database logging for transaction traceability, monitoring, and operational auditing.
- Built and maintained service integrations using webMethods Software AG with Oracle and SQL Server databases.
- Worked within an 8-member engineering team to deliver scalable and reliable middleware solutions.

SISTEM PEMBENDAHARAAN DAN ANGGARAN NEGARA (SPAN) REVAMP

Jul 2024 – Feb 2025

PT BANK NEGARA INDONESIA (Persero) Tbk

- Designed and developed microservices using Spring Boot, Spring Batch, and webMethods for financial transaction processing.
- Built automated services to generate ACK and Bank Statement reports for Ministry of Finance transactions.
- Implemented event-driven communication using Apache Kafka to improve transaction processing scalability.

- Deployed containerized applications using Docker and OpenShift Container Platform (OCP).
- Supported CI/CD implementation through GitLab for automated build and deployment pipelines.
- Collaborated with 8 developers to deliver end-to-end financial transaction processing effectively.

EMAS

Jan 2024 – Apr 2024

PT PEGADAIAN GALERI DUA EMPAT

- Developed internal web-based application features to support end-to-end gold transaction operations.
- Built modules for gold stock mutation, portfolio management, and transaction processing workflows.
- Ensured transaction integrity, operational efficiency, and data accuracy across critical business processes.
- Worked with Java and Vaadin Framework in Linux-based development environments.
- Collaborated with 2 Developers and 1 Business Analyst to enhance system usability and reliability.

OUTCOME BASED EDUCATION (OBE) APPLICATION

Feb 2022 - Feb 2023

DINAMIKA UNIVERSITY | [Intellectual Property Rights](#) | [Undergraduate Thesis](#) | [App Article](#)

- Define specifications and plan to produce the products that fulfill the requirements of OBE at Dinamika University.
- Design and modeling the database and system as needed.
- Build web-based applications using the Laravel framework.
- Testing the application using the black-box and System Usability Scale.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, PHP, SQL

Backend: Spring Boot, Spring Batch, NestJS, REST API, webMethods

Frontend: React.js, Vaadin, jQuery

Infrastructure / DevOps: Docker, OCP, TKGI, GitLab CI/CD, GitHub Actions

Messaging / Integration: Kafka, Redis

Databases: Oracle, PostgreSQL, MySQL, SQL Server, MongoDB

ADDITIONAL

Languages: Fluent in Indonesian and intermediate English
